

Electronic Compliance And Dismissal (ECAD) Fact Sheet (handout to district attorneys and clerks)

The information below will help you respond to questions that may come from the media and citizens with regard to ECAD. It is important that the media and citizens all get the same information, regardless of which county they're in.

- ECAD is a new web-based solution that is part of the larger initiative to modernize the North Carolina court system. The application delivers a fast, convenient means of requesting dismissal online for certain traffic offenses and potentially avoiding a trip to court.
- Because ECAD is integrated with North Carolina DMV data, the system automatically validates that public users are in a state of compliance before allowing a request for dismissal.
- Offenses included in Release 1.0 of ECAD include:
 - 5441 - No operator's license
 - 4527 - Failure to carry a valid driver's license
 - 4574 - Expired operator's license
 - 4440 - Expired / no inspection
 - 5485 - DR / allow registration plate not display
 - 5491 - Drive / allow MV no registration
 - 4721 - Cancelled/revoked/suspended certificate/tag
 - 5461 - Expired registration card/tag
- All offenses on a citation must be eligible for ECAD in order for the citation to be eligible.
- ECAD has three primary components: one for the public to request dismissal and check the status of pending requests, one for district attorneys to review requests and approve or deny them, and one for clerks to view the cases dismissed through ECAD.
- District attorneys will access ECAD through the functions menu in CCIS-DA, however there is no other overlap between ECAD and CCIS-DA functionality. Consequently, users do not need to be familiar with CCIS-DA in order to use ECAD.
- Once district attorneys approve an ECAD request, the case is electronically dismissed and the requestor is notified by email that they no longer need to appear in court.

- Any outstanding ECAD request that reaches five business days from the assigned court date without being addressed by the district attorney will be automatically denied and the defendant will be notified to appear in court on the assigned date.
- In order to maximize time savings in the courtroom, the initial release of ECAD only includes offenses that can be electronically checked for compliance with the NC DMV. This way, district attorneys are not required to evaluate compliance manually and can approve requests individually or in batches of up to twenty-five (25).
- Cases disposed through ECAD do not require any data entry on the part of the clerk.
- ECAD requires that public users provide an email address so the system can automatically send them email confirmation when their request is submitted and when it is addressed by the district attorney.
- Public users are not required to pay a cost for requesting dismissal through ECAD.
- ECAD will not allow public users to request dismissal if the date of submission is closer than seven business days to the assigned court date.
- All actions on cases processed through ECAD are tracked as events in CCIS-CC.
- New language has been added to traffic citations statewide to make the public aware that they may be able to request dismissal online through ECAD by visiting onlineservices.nccourts.org. eCitation has been upgraded statewide between mid-May and mid-July 2016 to include the additional language.
- ECAD is currently available in all N.C. counties as of July 18, 2016. The system was piloted in Wake County in May, followed by Ashe, Allegheny, Buncombe, Guilford, Wilkes, and Yadkin Counties in June.
- ECAD was developed over eight months from \$567,236 of non-recurring funding provided by the General Assembly during the 2015 long session (S.L. 2015-241 (HB 97)), and included development, statewide implementation and maintenance.

About N.C. Administrative Office of the Courts

The N.C. Administrative Office of the Courts (NCAOC) is the administrative agency for the [N.C. Judicial Branch](#), providing administrative services to help the North Carolina court system operate more efficiently and effectively, taking into account each courthouse's diverse needs, caseloads, and available resources. Among the many programs and services that it provides to courts statewide, NCAOC uses technology to improve the delivery of services to the public and to provide greater and more convenient access to court personnel.
